PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience in Java, Spring Boot, Spring Data JPA, Hibernate, RESTful APIs, SQL, and frontend development. Familiar with React basics, microservices, Git, Maven, SDLC, and Agile/Scrum. Seeking an entry-level Java Full Stack Developer role to build reliable, maintainable, and scalable web applications.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, SQL
Core Java:	OOP, Collections, Exception Handling, Multithreading, JDBC,Data Structures and Algorithms
Backend:	Servlets, JSP, RESTful APIs, CRUD Operations
Frameworks:	Spring, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JPA
Frontend:	HTML5, CSS3, JavaScript, React Basics, Bootstrap, Responsive Web Design
Architecture:	Microservices Fundamentals, MVC Architecture, Layered Architecture
Databases:	MySQL, PostgreSQL, Oracle SQL, SQL Queries
Tools & Build:	Git, Maven, Eclipse IDE, VS Code, MySQL Workbench, pgAdmin

PROJECTS

CareerForge – Job Application Tracker *Java, Spring Boot, Spring Data JPA, Hibernate, MySQL*

- Developed a job application tracking system to help users organize, monitor, and manage applications throughout the recruitment process.
- Implemented recruitment stages such as Applied, Assessment, Interview, Offer, and Rejected to provide clear application status tracking.
- Designed RESTful APIs for creating, retrieving, updating, deleting, searching, and filtering job application records.
- Added search and filtering functionality based on company name, job role, location, and application status.
- Used Spring Boot for backend development and Spring Data JPA with Hibernate for object-relational mapping and database operations.
- Integrated MySQL for persistent storage and structured the application using controller, service, repository, and entity layers.

Library Management System *Java, Hibernate, JPA, PostgreSQL*

- Developed a Java-based Library Management System to manage books, members, availability, book issuing, and return transactions.
- Implemented CRUD operations for adding, viewing, searching, updating, and deleting book and member records.
- Created book issue and return functionality to maintain transaction details and automatically update book availability.
- Used Hibernate and JPA for object-relational mapping and PostgreSQL for persistent application data storage.
- Applied entity, DAO, and service layers to separate database operations from business logic and improve application maintainability.
- Applied validation and exception-handling concepts to prevent invalid book, member, issue, and return operations.

INTERNSHIP EXPERIENCE

Data Engineering & Big Data Specialist Intern **Oct 2025 – Apr 2026**
Blackbucks Education Pvt. Ltd. *Hyderabad*

- Gained practical exposure to data processing, transformation, analysis, data pipelines, and handling large datasets.
- Applied data engineering fundamentals using structured data, database operations, and analytical workflows.

Python Full Stack Development Trainee **Jul 2024**
ExcelR EdTech Pvt. Ltd. in collaboration with APSCHE *Remote*

- Completed practical training in Python full-stack development and web application fundamentals.
- Worked with Python, HTML, CSS, JavaScript, and database concepts while developing web application components.

EDUCATION

B.Tech in Computer Science and Engineering **2022 – 2026**
Chebrolu Engineering College, Guntur – JNTUK *CGPA: 7.52*

Intermediate (MPC) **2020 – 2022**
Narayana Junior College *78%*

Secondary School Certificate (SSC) **2019 – 2020**
ZPHS School *97%*

CERTIFICATIONS

- Software Development using DevOps – Data Valley India Pvt. Ltd.
- Artificial Intelligence & Machine Learning – SmartBridge Educational Services Pvt. Ltd.
- ChatGPT, Prompt Engineering & Generative AI – Blackbuck Engineers Pvt. Ltd.
